DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, drawn to composite polyurethane foam.

Group II, claim 4, drawn to a process of making foam composite.

Group III, claim 5, drawn to a process of using foam composite.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is obvious over Chen et al. [US 6261679] or Wiilams et al. [US 5965030] in view of Strickman [US 3657125]. Both Chen and Williams disclose a porous structure with an oil absorbent coating for removing oil contaminant. Strickman describes a polyurethane as oil absorbent and also a polyurethane structure. The combined teachings render the instant invention of Group I obvious. The unity of invention is lacking and restriction is appropriate.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
